## DATA SHEET

### Human Primary Neuronal (Cortex) Freezing Media

<b>Catalog number:</b>	M36119-46FM
<b>Description:</b>	Human Primary Neuronal (Cortex) Freezing Media. Optimized for freezing Human Primary Neuronal (Cortex)s. Each lot is qualified to support Human Primary Neuronal (Cortex) freezing and thawing for Cell storage.
<b>Storage Conditions:</b>	-20 <sup>0</sup> C
<b>Tissue culture:</b>	The Human Primary Neuronal (Cortex) Freezing Media was tested and optimized with Human Primary Neuronal (Cortex) storage and recovery. The Human Primary Neuronal (Cortex) was grown on Celprogen's Human Primary Neuronal (Cortex) Extra-cellular Matrix pre-coated flasks and Media. Ideally the cells should be frozen down when they are in their growth phase. Prior to freezing the cells the media should be changed 24 hours before. Freezing cells: a slow and reproducible cooling rate is very important to ensure good recovery of cultures. A decrease of -1 to -3 <sup>0</sup> C / minute is recommended for Celprogen's cell culture.
<b>Product Orders:</b>	Before submitting an order you will be asked to read and accept the terms and conditions of Celprogen's Material Transfer Agreement.
<b>Permits/Forms:</b>	In addition to the MTA mentioned above, other CELPROGEN and/or regulatory permits may be required for the transfer of this CELPROGEN material. Anyone purchasing CELPROGEN material is ultimately responsible for obtaining the permits for their country of origin.
<b>Notices &amp; Disclaimers:</b>	<i>CELPROGEN products are intended for laboratory research purposes only. They are not intended for use in humans.</i> The product, Human Primary Neuronal (Cortex) Freezing Media, which contains 10% DMSO, is established and manufactured by CELPROGEN Inc., and is for Research Use Only. This product is not for re-sale and may not be transferred to a third party prior to written request and approval by CELPROGEN Inc.
