DATA SHEET

Bovine Fibroblast Stem Cell Derived Condition Media – 1L

Catalog number: M76041-12CM-1L

Description: Bovine Fibroblast Stem Cell Derived Condition Media: Total Volume of 1L. Media is available in ready to use format provided as a sterile filtered product. This media is optimized for use with Bovine Fibroblast Stem Cell. Each lot is qualified to support Bovine Fibroblast Stem Cell expansion, growth and proliferation. Formulated for use in a 5% CO₂ humidified incubator, and use in low O₂ environment: 5% O₂ in a controlled 37⁰C humidified incubator. The product may be utilized as one of the active ingredients for the formulation of cosmetic products. The product was tested and found negative for antibodies to HIV 1 & 2, antibodies to HCV and hepatitis B surface antigen. This Material when formulated as cosmetic product is for topical administration to humans.

Storage Conditions: -20 ⁰C

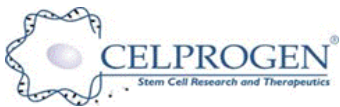

Specifications:

Shipping:	dry ice
pH Range:	Not more than (NMT) 8.0 +/- 3.0
Tests performed:	Microbial: negative
Total Stem Cell Proteins:	NMT 1.0 mg/ml +/- 0.05 mg/ml (OD ₂₈₀)
Appearance:	Light pink to yellow orange liquid
Solubility:	water
Form:	Liquid
Stability:	1 year at -20 ⁰ C
Water type 1 (18.2 mega ohms):	97.06%
Osmolarity:	260 -380mOsm/kg

The product may be utilized as one of the active ingredients for the formulation of cosmetic products. This Material when formulated as cosmetic product is for topical administration to Human Adults. This product is manufactured by Celprogen Inc., and is for topical use only.

Product Orders: Before submitting an order you will be asked to read and accept the terms and conditions of Celprogen’s Material Transfer Agreement (MTA).

Permits & Forms: In addition to the MTA mentioned above, other CELPROGEN and/or regulatory permits may be required for the transfer of this CELPROGEN material. Anyone purchasing CELPROGEN material is ultimately responsible for obtaining the permits.
