

STEM CELL RESEARCH & THERAPEUTICS

**FolliStem™** stimulates the growth of hair only if the hair follicle is present or is in a dormant / arrested growth stage. The individuals utilizing this product have noticed positive changes with their hair growth. Images taken before and after the application of FolliStem™ show clear improvement.

**FolliStem™** supports human hair follicle proliferation and growth when applied topically once daily to a clean scalp. One of the major benefits of the product is that once treatment is stopped the hair gained remains intact as evidenced by the three month study. The product works equally well for both genders.

At present, Celprogen is looking for ideal distributors and is interested in locating bulk manufacturers and distribution chains in both the United States and Internationally.

Price: \$125 for 30 ml – one month supply.

#### **Instruction for use:**

Once daily topical application:

1. After showering gently towel dry hair and scalp.
2. Apply a drop to your fingertips and massage evenly over the area of scalp being treated.
3. You may want to track product effectiveness with before and after images of area being treated.
4. Please note this product works by stimulating the growth of the human hair follicle, if the hair follicles are not present this product will not work.
5. This product is made with human adipose derived conditioned media with an active ingredient STEM8007 that stimulates growth and proliferation of hair follicle.
