DATA SHEET

Human Kidney Primary Cell Culture Serum Free Differentiation Media

Catalog number: M36059-01D

Description: Human Kidney Primary Cell Culture Serum Free Differentiation Media

with Antibiotics: Total Volume of 500ml. Media is available in ready to use format. This media is optimized for use with Human Kidney Primary Cell Culture. Each lot is qualified to support Human Kidney Primary Cell Culture differentiation, growth and proliferation. Formulated for use in a 5% CO₂ humidified incubator, and use in low O₂ environment: 5% O₂ in a

controlled 37°C humidified incubator.

Storage Conditions: 2-8 0 C

Tissue culture: The Human Kidney Primary Cell Culture Serum Free Differentiation Media

was tested and Optimized with Human Kidney Primary Cell Culture in Tissue Culture. The Human Kidney Primary Cell Culture were grown on Celprogen's Human Kidney Primary Cell Culture Extra-cellular Matrix precoated flasks and Human Kidney Primary Cell Culture Complete Differentiation Media. This media was optimized on this Extra-cellular Matrix and Media combination Cell Culture system for up to 12 passages within 80-120 population doublings. The media is formulated to be utilized in a 37°C humidified incubator with 5% CO₂. Note: Prior to using serum free media, the cells have to be weaned off their serum conditions. (Protocol

is provided with the purchase of the product).

Product Orders: Before submitting an order you will be asked to read and accept the terms

and conditions of Celprogen's Material Transfer Agreement (MTA).

Permits & Forms: In addition to the MTA mentioned above, other CELPROGEN and/or

regulatory permits may be required for the transfer of this CELPROGEN material. Anyone purchasing CELPROGEN material is ultimately

responsible for obtaining the permits.
